

# ELASTOMAG® SUPPORT WRAPS

## QUICK REFERENCE SHEET

- *Support and comfort combined with wellness innovations*
- *Helps ease soreness, relieve aches*
- *EQL Magnetic Technology*
- *Far-Infrared Technology*
- *Contoured, orthopedic design*
- *Flexible and stretchable*
- *Easy on-off fit*

### Elastomag Wrap construction

- 1 Stretchy, firm support is provided by the wrap material.
- 2 EQL Magnetic Technology extends magnetic coverage over the entire surface.
- 3 Far-Infrared Technology reflects energy to provide gentle warmth.

### ELASTOMAG SUPPORT WRAP FEATURES AND BENEFITS:

- **Orthopedically designed wraps** . . . . . Contoured to fit each part of the body, for a near-custom fit.
- **Strong, flexible material** . . . . . Produces a field that extends at every angle.
- **Stretchable base** . . . . . Combines the best of static and active magnetic fields.
- **EQL Magnetic Technology** . . . . . The only support wrap that offers complete magnetic coverage.
- **Far-Infrared Technology** . . . . . Ceramic-reflective fibers reflect energy in the far-infrared range, for breathable warmth.
- **Secure, adjustable closures** . . . . . To provide a snug fit without gaps or binding.
- **Available in a range of sizes** . . . . . For the best fit and support.

## QUICK REFERENCE SHEET

### THE FACTS

- Support wraps are well known to help ease sore joints and muscle, and to help speed recovery. Nikken improves on this principle by adding magnetic and far-infrared features — a combination you'll find in no other wrap product.
- Magnetic technology in Elastomag wraps is designed to replicate the Earth's magnetic field — the natural environment that human beings have lived in for thousands of years.
- Nikken EQL Magnetic Technology is a proprietary design that ensures a complete magnetic surface. Other magnetic support wraps use a few rigid, implanted magnets, that may produce as little as 2% actual coverage. Elastomag wraps provide 100% coverage that is consistent over the entire wrap. Instead of rigid magnets, the material itself is magnetic — soft, elastic, comfortably fitting itself to you.
- Actual thermographic photographs of Nikken support wraps show how Far-Infrared Technology works. Far-Infrared Technology helps provide an even, overall warmth. When you move or exercise, the energy expended is absorbed by the far-infrared fibers and reflected back in the far-infrared range, for increased comfort. It's like wearing a support wrap and heating pad in one.
- Each Elastomag Support Wrap is designed to conform to a specific area of the body — ankle, back, elbow, knee, wrist — because no two of these areas are shaped alike. An orthopedic surgeon was consulted to determine the ideal shape of Elastomag Support Wraps. The contoured design provides the right combination of support and flexibility that each area needs.

### PRODUCT INFORMATION

ITEM CODE	DESCRIPTION
#1681	Headband - one size fits all
#1683	Ankle wrap - one size fits all
#1684	Wrist wrap - one size fits all
#1631	Back belt - M
#1632	Back belt - L
#1698	Shoulder wrap - M
#1699	Shoulder wrap - L
#1686	Elbow wrap - M
#1691	Elbow wrap - L
#1687	Hand wrap - M
#1692	Hand wrap - L
#1688	Knee wrap - M
#1693	Knee wrap - L
#1695	Neck wrap - M
#1696	Neck wrap - L
<b>AVAILABILITY</b>	
US: YES CN: YES	
<b>FEATURED NIKKEN TECHNOLOGY</b>	
Nikken EQL Magnetic Technology, Far-Infrared Technology	
<b>CLEANING INSTRUCTIONS</b>	
Hand wash in warm water and mild detergent. Rinse thoroughly and air dry.	
<b>WARRANTY INFORMATION</b>	
1-year limited warranty	

### QUICK SHARING TIP

- Show the thermographic photographs of a person before and after wearing a Nikken wrap with Far-Infrared Technology. The pictures offer visible proof that this technology works to warm aching muscles and joints!
- When people try on an Elastomag Support wrap, they can feel the support instantly. After several minutes, they will also feel the warmth provided by Nikken Far-Infrared Technology.
